

Sheepblue - Smart Employee Scheduling

Sheepblue is a web-based software solution for automated employee scheduling that takes individual preferences into account.

Why is Sheepblue relevant to your business?

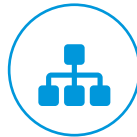

Complex rosters
The compliance with existing labor laws, regulations and work contracts make your rostering confusing and complicated?

Employee requests & swap shifts
You would like to focus more on preferences of your employees? Swapping a shift currently costs you a lot of effort and time?

Optimization & overtime
The optimization of the rosters is time consuming, because the clear overview is missing? Do you often have to pay overtime?

Organizational units & expansion
You want to schedule your employees across multiple locations, but you do not have the right tool?

UP TO
60%
better coordination between
personnel requirements and roster

UP TO
90%
less time spent through
automated scheduling

UP TO
3x
more smiles from employees because
their concerns are taken into account

Sheepblue offers a web-based software solution that fully automates the process of employee scheduling. It optimizes the roster according to the strong rules of the company (i.e. specific laws and regulations) and the individual preferences of the employees.

A Chatbot allows to communicate with employees in natural language and to automate interactions like swapping a shift.
